

Registration as a member of the Newbie new entrant network

In the EU funded project Newbie, we will establish a large network of new entrants and professionals who work in the field of new entrants into farming across Europe. Members of this network will be new entrants or successors with a farm and related business or professionals working in this field in advice, banking, education, retail, policy etc.

Registration will ensure we can keep you updated of results of the project (publications, events, developed tools etc.). For registration purposes we will ask you a few questions regarding your business and/ or your professional background. This will enable us to get an overview of new entrants across Europe and help to address the topic of new entrants and the obstacles they face.

The more participants who are included in the database, the more beneficial it will be to the agricultural community.

You can find further information on the project and its objectives at the project website here (www.newbie-academy.eu) or if you have any questions please contact info@newbie-academy.eu or your national contact point of Newbie [email address of national contact point].

We appreciate you giving your time to provide your details for inclusion in the database. Participation is completely voluntary and you are free to withdraw your data at any time without giving a reason (simply send an email to the address above). The data will be held securely at [insert name of national contact point's institution].

Your data will be used for academic research only (where it will be kept anonymous). The provided data will not be available for commercial use. At the end of the registration you will be asked for confirmation that you agree that Newbie project partners are allowed to use your data for project information and invitations to project events.
